SUMMARY

Human factors researcher designing for the moments a person must check, question or take over from automation. Human-machine teaming research for ONR, AFRL and Google; led 20+ people; elected PM of a NASA L'SPACE team.

CORE SKILLS

Human factors methods: experimental design, human-in-the-loop and simulator studies, usability testing, heuristic evaluation, task analysis, surveys, situational judgement assessment, incident analysis, WCAG 2.2

Tools: R, Unity, Blender, VR, eye tracking, Figma, Miro, Notion, Google Workspace; Siemens NX (in training)

EXPERIENCE

Project Manager; Human Factors & Operations Lead Sep 2026 – Present

NASA L'SPACE NPWEE, Team 11 · Remote

- Elected PM by an 8-member, cross-institutional team and NASA mentor; lead a NASA-style mission proposal.
- Delivered concepts on deadline; originated 2 as PI; 1 team concept advanced to the full proposal.
- Recruited 3 subject matter experts and a faculty advisor in 9 days from a 14-contact expert pipeline.

AI/ML Research Scientist & Fellow May 2026 – Sep 2026

Institute for Human-Centered AI, Howard University (RITA UARC) · Washington, DC

- Conducted human-machine teaming research across projects sponsored by ONR, AFRL and Google.
- Benchmarked speech recognition on African American Vernacular English to find where speech AI fails users.
- Mentored Howard computer science students on AI projects and AI ethics.

Chief Solutions Architect Dec 2025 – Aug 2026

Cioré, sustainable and ethical technology · Washington, DC

- Led 20+ people across 3 subteams (engineering, design, finance); hosted and presented team meetings.
- Met regularly with the C-suite and corresponded with the CEO to keep the product aligned with strategy.
- Promoted from UX design hire to Project Manager to Chief Solutions Architect.

Fellow, Human Performance Lab — *University of Massachusetts Amherst*

- Tested 3 bike treatments (sharrow, bike box, none) for cyclist comfort in a VR simulator with eye tracking.

Undergraduate Human Factors Researcher — *George Mason University* Through May 2025

- Researched social robotics and trust, vigilance, and multimodal learning, including telepresence robot studies.
- Served as human factors consultant to the language learning lab on documenting endangered languages.

Fellow, Organizational Science Institute — *UNC Charlotte* · trained in research on people and performance at work

EDUCATION

M.S., Systems Engineering (Engineering Management) — *Embry-Riddle Aeronautical University* In progress

B.S., Psychology, Human Factors & Applied Cognition — *George Mason University* May 2025

HFES-accredited · minor in Design Thinking · Projects: Titanic incident analysis; library website redesign

PUBLICATIONS

- Human-machine teaming paper, selected for presentation at the AIAA SciTech Forum, January 2027.
- *Human Machine Teaming Competence Assessment* (v1.0), situational judgement measure. Zenodo, 2026.

CERTIFICATIONS

Google UX Design Professional Certificate · Duke: Human Factors in AI · CITI: Human Subjects & RCR · DoD CUI

LEADERSHIP, HONORS & AFFILIATIONS

- Officer, Psi Chi Honor Society, GMU chapter (3 years) · Treasurer, AIAA Embry-Riddle Worldwide student branch
- Student Affiliate, Royal Aeronautical Society; proposed the HF – Flight Ops subgroup's human-AI teaming priority
- Bob Dahl Memorial Scholarship, Cargo Facts (2026) · Semper Fidelis Award for Musical Excellence (2021) · HFES
